THE ENCOUNTER

Emily Slackerman Ackerman
@EmilyEAckerman

i (in a wheelchair) was just trapped *on* forbes ave by one of these robots, only days after their independent roll out. i can tell that as long as they continue to operate, they are going to be a major accessibility and safety issue. [thread]

University of Pittsburgh ✅
@PittTweet

Replying to @EmilyEAckerman and @StarshipRobots

We have paused testing to review the technology further and ensure everyone's safety. We value your feedback and someone from Pitt will be in touch to learn more about your experience.

The sympathizing, worrying crowd

Mark Mandel
@markjmandel

I spotted @StarshipRobots at @UWMadison today — do they block wheelchair access here too? If so they should be out of service until this issue is fully addressed. twitter.com/emilyeackerman...

Zachary Baeil
@baielala

I still don't know how they are legally operating on the pedestrian only sidewalks.
The ordinances are very clear on this.
This is from Pittsburgh, but we have the same robots here.
Share your stories.

Jason Snell ✅
@jsnell

Spotted a robot (or not) on the streets of Berkeley yesterday.

Cy(berpunk) is anticapitalist
@cyrusinitaly

Replying to @EmilyEAckerman

Just had one partially block the accessibility ramp to one of the dining halls at @UWMadison. One person at a time could walk around, but no way a wheelchair could get around. Also likely a fire escape hazard/block.

oc-taber 💀
@taber

Students and staff at George Mason University have raised this flag - the delivery robots *CAN not and WILL not* get out of the way of people using wheelchairs - and it's terrifying that institutions are *still* signing up to voluntarily permit these things.

Tari of Darkness
@theinfophile

We have similar ones in Berkeley. They're always hogging the ramps.

The sympathizing, worrying crowd

I spotted @StarshipRobots at @UWMadison today — do they block wheelchair access here too? If so they should be out of service until this issue is fully addressed. twitter.com/emilyeackerman...

The disabled crowd

thread. this is, per usual, an issue of inaccessibility likely bc there were no disabled humans consulted/hired. i would not be surprised to learn engineers did not know history of curb cuts related to wheelchairs.

@StarshipRobots, how are you fixing this? #Hellalnaccessible

The tech/design crowd

Jared, INTERNATIONAL THOUGHT...
@jaredtm

Replying to @EmilyEAckerman

This is so upsetting. The people behind initiatives like this *should* be aligned advocates for accessibility. You can tell from what they made that they do not have a diverse group of human centered designers behind the wheel there.

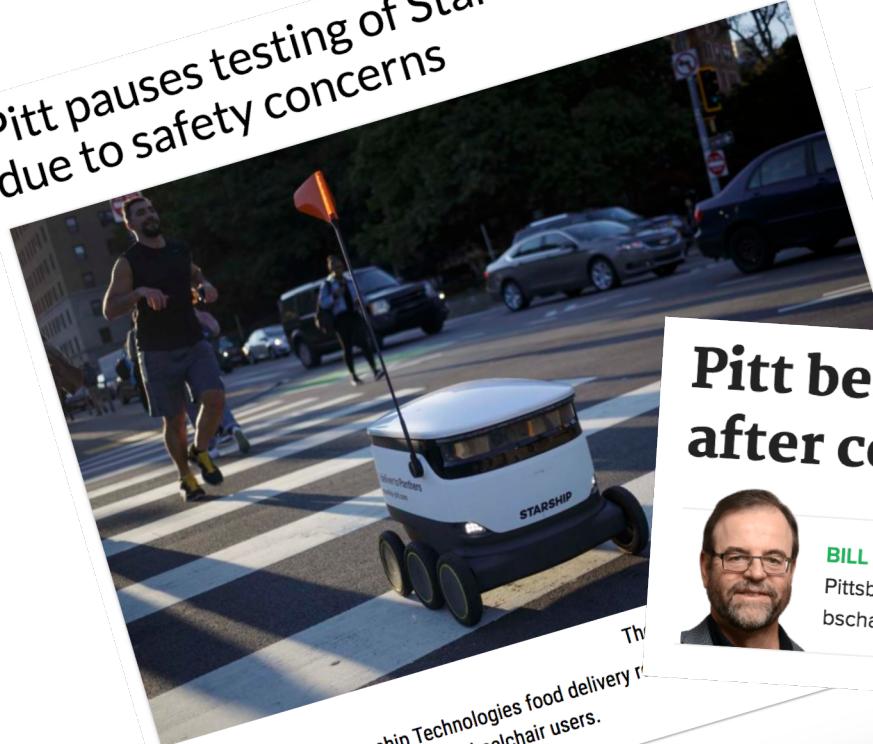

The well meaning, sometimes ableist crowd

Christine Casalini
@queen2knight

We need to innovate with accessibility in mind. Also do we really need food delivery robots???????

Pitt pauses testing of Starship robots due to safety concerns

The testing of the Starship Technologies food delivery robots has been paused at the University of Pittsburgh over potential safety issues for wheelchair users.

Progress is complicated: Pitt student starts dialogue on technology, accessibility

Experiments with new technologies should not come at the expense of safety or accessibility

Delivery robot pauses operations after Monday incident

A woman who relies on a wheelchair for mobility stopped on Forbes Avenue when robot wouldn't move

PITTSBURGH'S
ACTION NEWS

The food-delivery robots only served their stated purpose for a short time, causing quite a dust-up in the process. But the conversations, ideas and progress they have provoked have been well worth the controversy.

Ms. Ackerman is to be commended for sparking the conversation about the intersection of technology and accessibility. Having worked extensively at

My Fight With a Sidewalk Robot

A life-threatening encounter with AI technology convinced me that the needs of people with disabilities need to be engineered into our autonomous future.

NOVEMBER 19, 2019

EMILY ACKERMAN

Ph.D. student and disability rights advocate

Hi Emily,

The delivery robots are currently traveling around the [School] campus, and have already endangered one of my advisee's life (he uses a wheelchair).

THE RESULT: AIR TRANSPORTATION

Air travel is a private industry that falls under the Air Carriers Access Act, 1986

December, 2018:
701 wheelchairs and scooters were
damaged by the 12 most popular US
airlines

Decades of optimization hasn't
guaranteed safety or respect to the
disabled

THE PRESENT IS SCARY THEREFORE, THE FUTURE IS SCARIER

Where is the future of technology,
robotics, AI, etc. headed?

Who's driving the spaceship?

**“Where are the disabled engineers?
I’d hire them if they existed!”**

POOR REPRESENTATION IS CAUSED BY INACCESSIBILITY AT TWO LEVELS

Equal access to
tech for users

Developer
access to
industries

REPRESENTATION

As a result, the tech industry is in a place where it ***must***
anticipate the needs of its users

POOR REPRESENTATION IS CAUSED BY INACCESSIBILITY AT TWO LEVELS

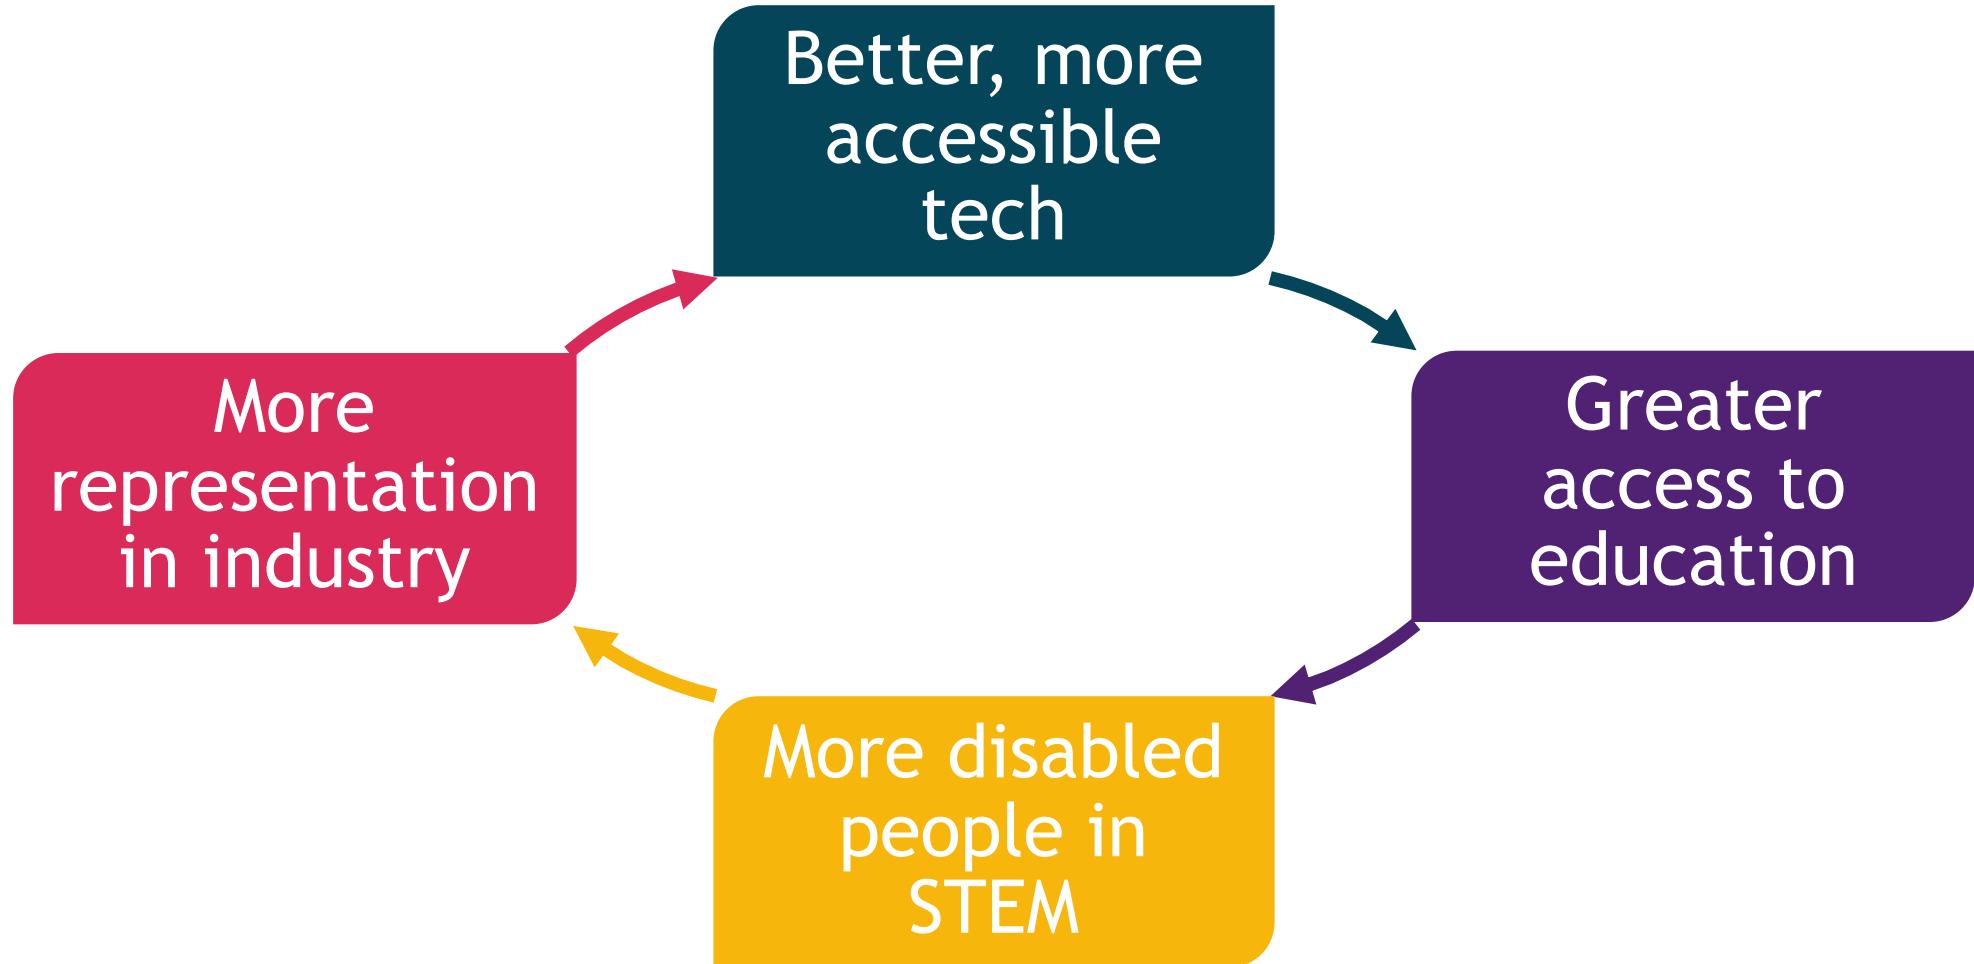

As a result, the tech industry is in a place where it *must* anticipate the needs of its users

The goal: A future where

1. abled developers aren't responsible for foreseeing a user experience they'll never have
2. the burden doesn't fall to the user to protest or rely the good faith of the developer

THIS IS A TEMPORARY PROBLEM

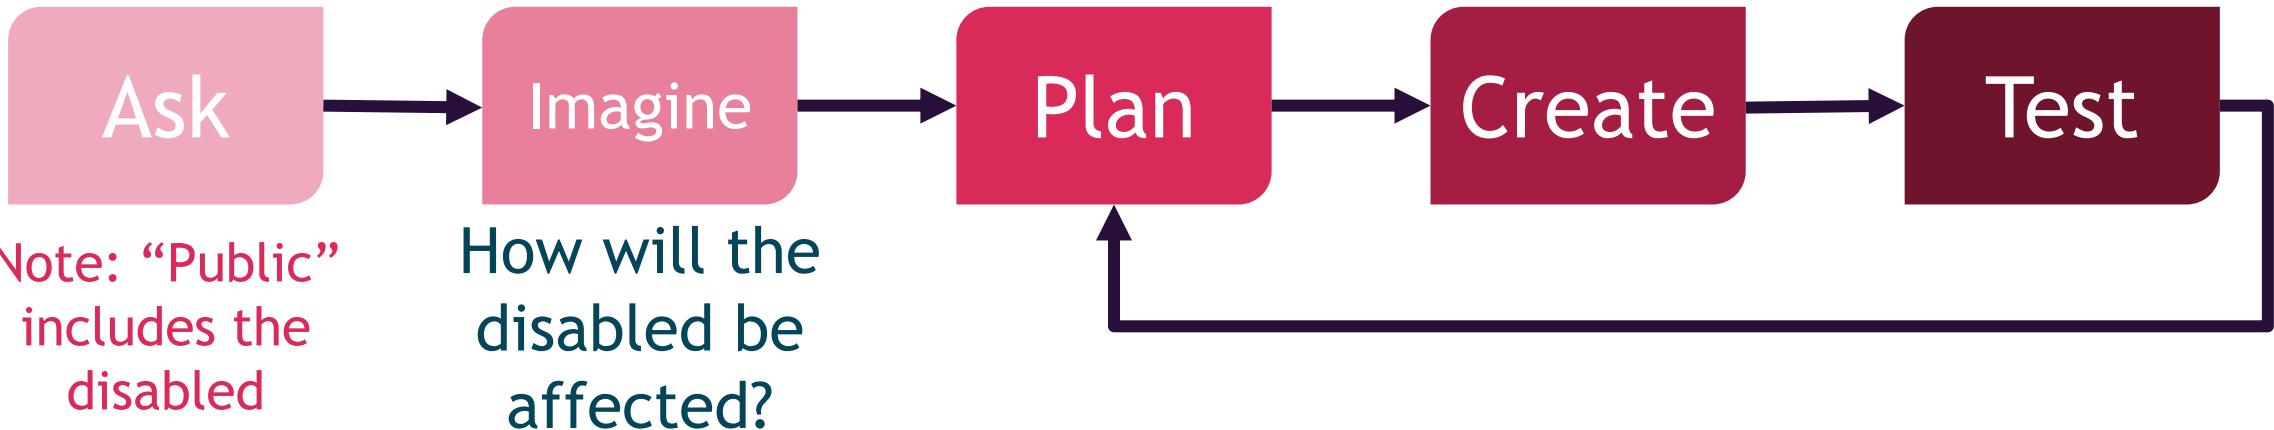

THE SOLUTION IS POSITIVE FEEDBACK

THE INDUSTRY MUST DIVERSIFY

Multilevel involvement in the design process is key

Who is the user? What are their needs?

THE INDUSTRY MUST DIVERSIFY

Multilevel involvement in the design process is key

Inaccessible solutions are harmful,
even when accidental or resulting from noble intention

Greater recognition of voluntary and involuntary users

THE INDUSTRY MUST SLOW DOWN

A harmful solution isn't good because it's first

Development is fast, reactionary legislation is slow

Design must be based in ethical decision making

We have no trust in “good faith”

*“Move fast and break things” cannot come at the expense
of the marginalized*

| EDUCATION MUST BECOME MORE ACCESSIBLE

(A WHOLE TALK IN ITSELF)

What can you do in your department/company? in your community?

Do your children have disabled role models?

How can you make your work less of a black box for the public?

Public education on the future of tech is necessary

THIS IS A TEMPORARY PROBLEM

We in the disability community need:

Recognition of the disabled experience

Access to equitable, ethical solutions

Commitment from the tech to actively bring us inside

THANK YOU!
